Brainstorming & Idea Prioritization Template

Author	Nandini Bade
Program	SkillWallet, ServiceNow Global Certification
Platform	ServiceNow (Service Catalog, Flow Designer, Business Rules)
Document	Phase 1: Ideation Phase - Brainstorming & Idea Prioritization Template

1. Overview & Purpose

Brainstorming provides a free and open environment that encourages team members to participate in creative thinking for problem solving. In the Car Rental Request Automation project, the goal is to replace manual paper/email-based car rental booking processes with a streamlined ServiceNow Service Catalog workflow.

Step 1: Team Gathering, Collaboration & Problem Selection

Primary Lead: Team Members: Nandini Bade (ServiceNow Developer & System Administrator).

Selected Problem Statement: Manual paper forms, delayed manager approvals, lack of real-time vehicle availability tracking, and lost audit trails for corporate transportation.

Step 2: Brainstorm, Idea Listing & Grouping

1. Self-Service Portal Form: Single catalog item with fields for Requestor, Car Type (Mini, SUV, Sedan), Requested Date, Pickup/Drop Locations, Duration, and Reason.

2. Automated Workflow Studio Engine: Automatic approval routing to manager; on approval, auto-generation of Catalog Task for Transport Team.

3. Exception Handling via Business Rule: If a requested car is unavailable (State = 3), automatically create an Incident ticket linked to the RITM with trip details.

4. Real-time Notifications: Email notification dispatched to requestor upon approval/completion.

Step 3: Idea Prioritization Matrix

Idea Description	Feasibility	Impact	Priority	Selected Status

Service Catalog Form with 7 Variables	High	High	High (P1)	Approved & Implemented
Flow Designer Approval & Catalog Task	High	High	High (P1)	Approved & Implemented
Business Rule for Car Unavailability Incident	High	Medium	Medium (P2)	Approved & Implemented
Email Notification Log Engine	High	Medium	Medium (P2)	Approved & Implemented
