Data Flow Diagrams and User Stories

Author	Nandini Bade
Program	SkillWallet, ServiceNow Global Certification
Platform	ServiceNow (Service Catalog, Flow Designer, Business Rules)
Document	Phase 2: Requirement Analysis - Data Flow Diagrams and User Stories

1. Data Flow Diagram (DFD) Specification

A Data Flow Diagram depicts how information enters, flows through, and leaves the ServiceNow platform for Car Rental Request Automation.

DFD Level 0 (Context Diagram)

[Requester (Employee)] ---> (Submits Request) ---> [ServiceNow Platform: Car Rental Automation System] ---> (Generates Approval) ---> [Approver (Manager)]

[ServiceNow Platform] ---> (Generates Fulfillment Task) ---> [Transport Team] ---> (Sends Email / Incident) ---> [Requester / Incident Desk]

DFD Level 1 (Process Breakdown)

1. Process 1.0 (Service Catalog Item): Receives form variables (Car Type, Requested Date, Pickup/Drop Location, Duration, Requestor, Reason) and creates REQ & RITM records in Data Store (sc_req_item).

2. Process 2.0 (Flow Designer Workflow): Evaluates trigger, sets Approval field to 'Requested', pauses until approver responds, then checks condition 'If Approved'.

3. Process 3.0 (Fulfillment Task): Generates sc_task record assigned to 'Transport Team' with description 'Verify This Item And Assign To A Person Who Manages'. Pauses until task closed.

4. Process 4.0 (Notification & Exception): Dispatches email to Requestor upon completion. If RITM state = 3 (Unavailable), Business Rule executes GlideRecord script to create Incident record.

2. Agile User Stories Table

User Type	Epic	User Story No.	User Story / Task Description	Acceptance Criteria	Priority	Sprint Release

Employee	Catalog Setup	USN-1	As a user, I can access the Car Rental Request catalog item under Transportation Services.	Item appears with all 7 variables.	High	Sprint-1
Employee	Catalog Setup	USN-2	As a user, I can select Car Type choices (Mini, SUV, Sedan).	Dropdown choice list functional.	High	Sprint-1
Approver	Workflow Studio	USN-3	As an approver, I receive an approval request on RITM creation.	Approval record generated in Requested state.	High	Sprint-1
Transport Team	Workflow Studio	USN-4	As a Transport team member, I get a Catalog Task (sc_task) when approved.	sc_task assigned to Transport Team.	High	Sprint-2
Employee	Notifications	USN-5	As a requester, I receive an email confirmation once the task is closed.	Email log reflects approval message.	Medium	Sprint-2
System Admin	Business Rules	USN-6	As an admin, if car state is unavailable (3), an Incident ticket is created	GlideRecord script creates Incident record.	High	Sprint-2

			automatically.			
System Admin	Update Sets	USN-7	As an admin, all catalog, flow, and business rule configurations are saved in a named Update Set.	Update Set complete & exportable.	High	Sprint-2
Governance	Testing	USN-8	As an auditor, all REQ, RITM, approval, and task records maintain full traceability.	All records linked properly.	Medium	Sprint-2
