Solution Requirements (Functional & Non-Functional)

Author	Nandini Bade
Program	SkillWallet, ServiceNow Global Certification
Platform	ServiceNow (Service Catalog, Flow Designer, Business Rules)
Document	Phase 2: Requirement Analysis - Solution Requirements (Functional & Non-Functional)

1. Functional Requirements (FR)

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Service Catalog Configuration	Create 'Car Rental Request' catalog item in 'Service Catalog' under 'Transportation Services' category with Active and Published state.
FR-2	Variable Set Configuration	Configure 7 catalog variables: Car Type (Select Box), Requested Date (Date), Pickup Location (Single Line Text), Duration Hours (Numeric Scale), Requestor (Reference to sys_user), Drop Location (Single Line Text), Reason (Multi Line Text).
FR-3	Choice List Definition	Define Question Choices for Car Type variable: Mini, SUV, and Sedan.
FR-4	Flow Designer Workflow	Implement 'Car Rental Req' flow with Service Catalog

		trigger, Ask For Approval, If Approval State = Approved, Create Catalog Task (assigned to Transport Team with Wait=true), Get Catalog Variables, and Send Email.
FR-5	Business Rule Exception Handling	Configure Business Rule 'Create Incident If Car Unavailable' on sc_req_item table (After Insert/Update, Order 100) running GlideRecord script when current.state == 3.
FR-6	Deployment Packaging	Capture all catalog, flow designer, and business rule configurations inside a named ServiceNow Update Set.

2. Non-Functional Requirements (NFR)

NFR No.	Non-Functional Requirement	Description & Metric
NFR-1	Usability	Service Portal catalog form must be intuitive, accessible within 3 clicks, with clear field labels and mandatory validation.
NFR-2	Security	Role-based access control (RBAC) enforced via ServiceNow ACLs. Requesters can only view their own RITMs; approvers and Transport Team members access assigned tasks.
NFR-3	Reliability	Flow Designer execution engine ensures zero message loss during approval pauses and task completion wait states.

NFR-4	Performance	Form submission and REQ/RITM generation response time < 2 seconds; email notification dispatch latency < 5 seconds.
NFR-5	Availability	High availability provided via ServiceNow Cloud Infrastructure (99.95% uptime SLA).
NFR-6	Maintainability & Scalability	Configuration modularized using ServiceNow Global Scope Update Sets, allowing easy migration across Dev, Test, and Production instances.
