Problem - Solution Fit Template

Author	Nandini Bade
Program	SkillWallet, ServiceNow Global Certification
Platform	ServiceNow (Service Catalog, Flow Designer, Business Rules)
Document	Phase 3: Project Design Phase - Problem - Solution Fit Template

1. Problem vs Proposed ServiceNow Solution Fit

The Problem-Solution Fit document validates that the proposed ServiceNow automation directly addresses the core operational bottlenecks identified in manual car rental processing.

Identified Problem / Pain Point	Legacy Workaround	ServiceNow Proposed Feature	Validation & Measurable Outcome
Paper forms and slow email approvals	Manual paper slips signed physically	Service Catalog Item + Flow Designer Approval Action	Approval turnaround reduced from days to minutes; 100% digital audit log.
Lack of task tracking for vehicle dispatch	Phone calls to Transport Desk	Automated Catalog Task (sc_task) assigned to Transport Team	Task SLA tracking, clear ownership, and zero missed dispatches.
No exception handling for unavailable cars	Rejections without alternative arrangements	Business Rule: 'Create Incident If Car Unavailable'	Automatic Incident ticket generated when State=3, notifying fleet management immediately.
No requester status updates	Unanswered email inquiries	Automated Flow Designer 'Send Email' Action	Immediate confirmation email dispatched to requester upon task

closure.
