| **Document** | Phase 4: Project Planning Phase - Planning Logic and Estimation Guide |

## 1. Agile Framework Definitions

**Sprint:** A fixed period or duration in which a team works to complete a set of user stories/tasks.

**Epic:** A large body of work that is broken down into smaller stories across sprints.

**User Story:** A specific feature description from an end-user perspective.

**Story Point:** A Fibonacci scale (1, 2, 3, 5, 8) representing relative effort and complexity.

## 2. Sprint Estimation Breakdown

### Sprint 1: Environment & Service Catalog Setup (6 Days)

• Epic 1: Catalog Configuration | USN-1: Create Catalog Item 'Car Rental Request' (2 Story Points)

• Epic 1: Catalog Configuration | USN-2: Add 7 Catalog Variables & Choice List (Mini, SUV, Sedan) (3 Story Points)

• Epic 2: Workflow Setup | USN-3: Create 'Car Rental Req' flow & Service Catalog trigger (3 Story Points)

• Total Story Points in Sprint 1 = 2 + 3 + 3 = 8 Story Points

### Sprint 2: Workflow Logic, Business Rules & Testing (6 Days)

• Epic 2: Workflow Setup | USN-4: Add Ask For Approval & If Condition logic (3 Story Points)

• Epic 2: Workflow Setup | USN-5: Add Create Catalog Task (sc_task) assigned to Transport Team (3 Story Points)

• Epic 3: Notifications & Exceptions | USN-6: Add Get Catalog Variables & Send Email action (2 Story Points)

• Epic 3: Notifications & Exceptions | USN-7: Build Business Rule for Unavailable Cars (GlideRecord Incident creation) (5 Story Points)

• Epic 4: Quality & Deployment | USN-8: End-to-End Testing (T1-T11) & Update Set Export (4 Story Points)

• Total Story Points in Sprint 2 = 3 + 3 + 2 + 5 + 4 = 17 Story Points

## 3. Velocity Calculation

Total Story Points Completed = 8 (Sprint 1) + 17 (Sprint 2) = 25 Story Points

Number of Sprints = 2 Sprints

Team Velocity = 25 / 2 = 12.5 Story Points per Sprint.
