User Acceptance Testing (UAT) Report

Author	Nandini Bade
Program	SkillWallet, ServiceNow Global Certification
Platform	ServiceNow (Service Catalog, Flow Designer, Business Rules)
Document	Phase 5: Project Development Phase - User Acceptance Testing (UAT) Report

1. Functional Test Cases (T1 - T9)

#	Test Case	Test Steps	Expected Result
T1	Item Visible	Open catalog and search Car Rental Request	Item appears under Transportation Services category with all 7 fields.
T2	Car Type Choices	Open Car Type dropdown	Mini, SUV, and Sedan choices are listed.
T3	Submit Request	Fill in form fields and click Order Now	Confirmation page displays REQ number (e.g. REQ0010004).
T4	Records Created	Open REQ and check linked RITM	RITM is linked to REQ and all 7 variables are saved.
T5	Approval Generated	Open RITM and check Approvers related list	Approval record created in Requested state for assigned approver.
T6	Approve Action	Approver clicks	Approval state on RITM updates to

		Approve	Approved; flow resumes.
T7	Task Creation	Check Catalog Tasks related list	An sc_task record is created assigned to Transport Team with Wait=enabled.
T8	Email Log	Close catalog task and check email log	'Your Car Request is approved.' email is generated for requestor.
T9	Flow Execution	Open Flow Designer Executions log	Every action displays status Completed with zero errors.

2. Negative and Exception Tests (T10 - T11)

#	Test Case	Test Steps	Expected Result
T10	Rejection Path	Approver clicks Reject on approval record	Approval State becomes Rejected; no catalog task or email generated.
T11	Unavailable Car Incident	Set RITM state to 3 (Unavailable)	Business Rule executes GlideRecord script; Incident ticket created with short description 'Car unavailable for request: RITM...'
